Reasons for Allowance

Claims 15-32,37-40,42-45 and 47-64 are allowable.

Takahara et al discloses a defective pixel compensation system comprising: a display device having three display panels, each of the three display panels displaying only one color image (Figure 24) means for specifying a display panel having a defective pixel out of the three display Panels, means for specifying coordinates of the defective pixel (these means are broad and met by any means for identifying and specifying location, therefore inherent to any system that does correction as identification is absolutely necessary for correction; means for changing the defective pixel to a dark dot is specified in column 57, lines 5-15 including the use of the laser (claims 41 and 46).

Takahara et al does not disclose the means for increasing a brightness of at least one of the pixels having a same coordinates as the defective pixel in the display panels other than the display panel having the defective pixel.

Thus, details regarding the increasing brightness of pixels having same coordinates as the defective pixels in the display panel other than the display having the defective pixel do not closely read on those specifics set forth in the present invention. Therefore, the present invention is considered to be patentable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
